
L vs fixed rule F
L vs body model M
A
harmful-outcome rate
(L minus comparator)
B
safe-completion rate
(L minus comparator)
Ladder set, record error 20° (n=300)
Replication (n=300)
Half of restrictions unrecorded
Posture noise, SD 5°
No posture input
Graded resistance 20° (n=150)
Shifted population (n=250)
Test physics: reflex gain ×3
Test physics: body variation σ=0.40
